Bachelor of Commerce (Honours) Semester – I

Session 2025-2026

Course Code: BCRL–1175

Course Title: Business Statistics

Course outcomes:

After the successful completion of this course, students will be able to-

CO1: learn the basic statistical analysis techniques by using central tendency.

CO2: analyze the data by using dispersion and learn the relationship between variables and prediction using correlation and regression..

CO3: compare magnitudes of related variables to each other and over a period of time and also to have knowledge about index numbers.

CO4: understand the some basic techniques of time series analysis in analyzing economics problems and introductory applications of probability.

Bachelor of Commerce (Honours) Semester – I

Session 2025-2026

Course Code: BCRL–1175

Course Title: Business Statistics

Time: 3 Hours

L-T-P (Credits): 4-0-0

Max. Marks: 100

Theory: 70

CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit-I

Definition, Meaning, Functions, Scope and Limitations of Statistics.

Measures of Central Tendency: Types of averages–Arithmetic Mean (Simple and Weighted), Median and Mode.

Unit-II

Measures of Dispersion: Range, Quartile Deviation, Mean Deviation, Standard Deviation and Coefficient of Variation.

Simple Correlation and Regression: Meaning, Types, Karl Pearsons & Rank Correlation (Excluding grouped data), Probable Error and Standard Error.

Unit-III

Index Numbers: Meaning and Importance, Methods of construction of Index Numbers:

Weighted and Unweighted; Simple Aggregative Method, Simple Average of Price Relative Method, Weighted Index Method: Laspeyre's Method, Pasche's Method and Fisher's Ideal method including Time and Factor Reversal tests. Splicing.

Unit-IV

Time Series Analysis: Components, Estimation of Trends (Graphical method, Semi Average Method, Moving Averages Method and Method of Least Squares for linear path).

Probability: Conceptual Meaning and Definition of Probability, Theorems of Probability–Addition and Multiplication theorem of Probability and Concept of Conditional Probability (Simple Applications)

Suggested Readings:

1. Chandan, J.S.(1998), *Statistics for Business and Economics*, 1st Edition, Vikas Publishing House Pvt. Ltd.
2. Gupta, S.C. (2018), *Fundamentals of Statistics*, Himalayan Publishing House, Delhi.
3. Gupta, S. P. (2011), *Statistical Methods*, S. Chand Publications, New Delhi.
4. Siegel, Andrew F. (2011), *Practical Business Statistics*, International Edition, McGraw Hill Irwin.

Note: The latest edition of the books is recommended.

Bachelor of Commerce (Honours) Semester – II
Session 2025-2026
Course Code: BCRL–2175
Course Title: Business Economics

Course outcomes:

After the successful completion of this course, students will be able to –

CO1: have an in-depth understanding of the preliminary concepts about consumer behaviour.

CO2: learn about the various concepts of cost and revenue, and the production function.

CO3: learn about various market structures and its role in price determination.

CO4: understand the concept of national income and methods of its estimation and learn about the consumption function.

Bachelor of Commerce (Honours) Semester – II

Session 2025-2026

Course Code: BCRL–2175

Course Title: Business Economics

Time: 3 Hours

L-T-P (Credits): 4-0-0

Max. Marks: 100

Theory: 70

CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit-I

Theory of Demand: Meaning of demand and its types, law of demand, price elasticity of demand and its measurement.

Consumer's Behaviour: Utility approach: Brief outline of law of diminishing marginal utility and law of equi-marginal utility.

Indifference Curve Approach: Meaning, properties, price, income and substitution effect, Revealed preference approach.

Unit-II

Theory of Production: Law of variable proportions and law of returns to scale, traditional and modern theory of costs (short run and long run).

Revenue: Average revenue, marginal revenue and total revenue, relationship between average revenue and marginal revenue and elasticity of demand.

Unit-III

Perfect Competition: Meaning, features, price and output determination of firm and industry.

Monopoly: Meaning, features, price and output determination and price discrimination.

Monopolistic Competition: Meaning, features, price and output determination.

Unit-IV

National Income: Definition and Importance of National Income, Gross and Net Domestic Product, Personal Income and Disposable Income; Measurement of National Income: Income, Output and Expenditure Method, Problems in measurement of National Income particularly in underdeveloped countries.

Consumption: Meaning, determinants (subjective and objective) and importance, Keynes' Psychological law of consumption.

Suggested Readings:

1. Dwivedi, D.N.(2009) *Managerial Economics*, 7th Edition, Vikas Publication.
2. Maheswari&Varshney, *Managerial Economics*, S. Chand & Co., New Delhi.
3. Koutsoyiannis A., *Modern Micro Economics*, 2nd edition, MacMillan House, New Delhi.
4. Ahuja, H. L. (2009), *Modern Micro Economics*, Sultan Chand and Co., New Delhi.

Note: The latest edition of the books is recommended.

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit – I

Theory of Demand: Meaning of demand and its types, Law of demand; Price Elasticity of demand: degrees and its measurement.

Consumer's Behaviour: Utility approach (Brief outline of law of diminishing marginal utility and law of equi-marginal utility).

Unit – II

Indifference Curve Approach: Consumer equilibrium, Income, Price and Substitution effect.

Revealed Preference Approach.

Theory of Supply: Concept and law of supply, factors affecting supply.

Unit – III

Theory of Production: Law of variable proportions, total, average and marginal physical product, Law of Returns to scale, Economies and diseconomies of scale.

Theory of Cost: Short and Long period costs, Concept of total cost, Marginal and Average cost, Theory of Cost in Short-run and Long-run.

Concept of revenue: Total Revenue, Average Revenue, Relationship between Average and Marginal Revenue and Price Elasticity of Demand.

Unit – IV

Pricing Under Various Market Conditions: Perfect Competition - Equilibrium of Firm and Industry under Perfect Competition; Monopoly - Price determination under Monopoly; Monopolistic Competition - Price and Output determination under Monopolistic Competition.

Suggested Readings:

1. Ahuja, H.L.(2018), *Advanced Economics Theory: Micro Economics analysis*, S. Chand Publishing.
2. Dwivedi, D.N. (2018), *Microeconomics: Theory and Applications*, Pearson Education, New Delhi.
3. Koutsoyiannis, A. (2015), *Modern Microeconomics*, Macmillan Press, London.
4. Sen, A. (2007), *Microeconomics: Theory and Applications*, Oxford University Press, New Delhi.

Course Code: BBRL-3173
Statistics for Business

Course outcomes:

After passing this course students will be able to:

CO1: understand the techniques of presentation, analysis of data, and basics of matrices and its determinants.

CO2: analyze the data using techniques of central tendency and dispersion.

CO3: learn the relationship between variables and prediction using correlation and regression and also understand the concept of time series in analyzing economics problems.

CO4: compare magnitudes of related variables to each other and over a period of time, and concepts of probability.

Bachelor of Business Administration (Honours) Semester – III

Session 2025-2026

Course Code: BBRL-3173

Course Title: Statistics for Business

Time: 3 Hours

L-T-P (Credits): 4-0-0

Max. Marks: 100

Theory: 70

CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

UNIT-1

Matrix Algebra: Types of matrices, basic operations of matrices, determinant of a matrix and its properties, rank and inverse of a matrix, solution of simultaneous linear equations – Cramer's rule and matrix inversion method, **application of matrices.**

UNIT-II

Introduction and methods of presentation of statistical information, Collection and presentation of data. Frequency distributions. Concept of sampling and sampling designs.

Measures of Central Tendency: Mean, Median, Mode. Measures of dispersion: Range, quartile deviation, Average deviation and Standard deviation.

UNIT-III

Simple Correlation and Regression Analysis: Assumptions, Karl Pearson's product moment and Spearman's rank correlation method, least squares technique, properties of correlation and regression coefficients.

Time Series Analysis: Trend analysis using moving average and regression analysis, seasonal, cyclical and irregular fluctuations; Measurement of trend analysis using moving average and least square method.

Index number, construction of unweighted and weighted index numbers, quantity Index.

UNIT-IV

Elementary Probability Theory: Deterministic and non-deterministic experiments, different types of events, a priori and empirical definition of probability, Conditional probability, laws of addition and multiplication of probability, Properties of Binomial, Poisson and Normal distributions.

Suggested Readings:

1. Gupta, S.C. (2018), *Fundamentals of Statistics*, Himalaya Publishing House, 7th Edition, Delhi.
2. Gupta, S.P. (2014), *Statistical Methods*, Sultan Chand & Sons, 43rd Edition, Delhi.
3. Chiang A.C., *Fundamental Methods of Mathematical Economics*, McGraw Hill, Kogakusha.
4. Croxton, F.E., Cowden, D.J. and Klien, S., *Applied General Statistics*, Prentice Hall of India Pvt. Ltd.

Note: The latest edition of the books is recommended.

Master of Commerce under Five Years Integrated Programme (Semester III)
(Credit Based Continuous Evaluation and Grading System)
Session: 2025-2026
Course Title: Elementary Statistics
Course Code: FCOL-3173

Course Outcome: On completion of this course, the students will be able to:

- CO1:** Develop an understanding of statistical concepts and analyze data using measures of central tendency.
- CO2:** Interpret statistical data through graphical methods such as frequency and cumulative frequency distributions, and apply measures of dispersion for data analysis.
- CO3:** Understand the axiomatic formulation/principles of modern probability theory and probability distributions.
- CO4:** Gain insight into the fundamental concepts of sampling and sampling distributions.

Master of Commerce under Five Years Integrated Programme (Semester III)
(Credit Based Continuous Evaluation and Grading System)
Session: 2025-2026

Course Title: Elementary Statistics
Course Code: FCOL-3173

Time: 3 Hours

L-T-P (Credits): 4-0-0

Max. Marks: 100

Theory: 70

CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit- I

Introduction to Statistics: Meaning, Scales of Measurement, Types of Data and Variables, Population and Sample, Sampling Error and Bias, Applications of Statistics in Economics and Business.

Measures of Central Tendency: Application and Computation of Mean-Arithmetic, Geometric, Harmonic Mean; Median, Mode, Quartiles and Percentiles using Excel. Relationship between AM, GM and HM. Empirical Relationship between Mean, Median and Mode.

Unit- II

Data Tabulation and Visualization using Excel: Tabulating and Graphing Discrete, Categorical and Continuous data using Frequency distribution, Bar Chart, Pie Chart, Histogram, Frequency Polygon and Scatter Diagram.

Measuring Parameters of Dispersion using Excel: Range and Inter Quartile Range, Standard deviation, Variance, Coefficient of Variation, Skewness and Kurtosis.

Unit -III

Probability and Probability Distributions-Concepts and Rules, The Total Probability Rule and Bayes' Theorem, Random Variables and Discrete Probability Distributions, Binomial, Poisson and Normal Probability Distribution.

Unit -IV

Sampling and Sampling Distribution: Introduction, Random Sampling Methods, Non Random Sampling Methods, Central Limit Theorem, Sampling Distribution of proportion, Sampling Distribution of Mean both when standard deviation is known and unknown.

Software Used: All practical problems will be solved through Excel.

Suggested readings:

1. Levin, Richard and David S. Rubin. "Statistics for Management", Prentice Hall of India, New Delhi, 8th Edition, 2019.

2. Render, B. and Stair, R. M. Jr., “Quantitative Analysis for Management”, Prentice– Hall of India, New Delhi, 13th Edition, 2017.
3. Gupta C B, Gupta V, “An Introduction to Statistical Methods”, Vikas Publications, 2004.
4. Berenson, L.M., Krehbiel, T.C., Vishwanathan, P.K. and Levine, D.M., “Business Statistics: A First Course”, Pearson Education, 7th edition, 2015.
5. Leekley, Robert M. “Applied Statistics for Business and Economics”. Illinois Wesleyan University, Bloomington, Illinois, USA,

Note: Latest editions to be followed

Master of Commerce under Five Years Integrated Programme (Semester III)
(Credit Based Continuous Evaluation and Grading System)
Session: 2025-2026
Course Title: Workshop on Data Analysis through Statistical Softwares
Course Code: FCOL-3170

Course Outcome: On completion of this course, the students will be able to:

- CO1:** Realizing the importance of complex data analysis challenges and growing need of exports to handle the complexities.
- CO2:** The course is designed to provide hands on training of the widely popular open source Software(s).
- CO3:** The course will get the students familiar to the ten tools for visualization and analysis in statistical software to prepare them for the data driven world.
- CO4:** With thorough understanding of the concepts and practical knowledge of statistical software, the student will grow to be confident data analysts.

Master of Commerce under Five Years Integrated Programme (Semester III)
(Credit Based Continuous Evaluation and Grading System)
Session: 2025-2026

Course Title: Workshop on Data Analysis through Statistical Softwares
Course Code: FCOL-3170

Time: 3 Hours

L-T-P (Credits): 2-0-0
Max. Marks: 50
Theory: 35
CA: 15

Instructions for the Paper Setters:

Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four Units (I-IV). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each unit. The fifth question may be attempted from any unit. The duration for exam will be 3 hours.

Unit-I

- Nature and Type of data: Nominal, Ordinal and Cardinal.
- Data Editing and Data Transformation.

Unit-II

- Measures of Central Tendency: Mean, Trimmed Mean, Median, Mode.

Unit-III

- Measures of Variation: Range, Standard deviation, Variance, coefficient of variation, quartiles, percentiles, deciles. Measures of Skewness and Kurtosis

Unit-IV

- Creation and interpretation of Histogram: Box plot, Bar chart, Violin, Q-Q plots, Density, Scatter plot, Pareto Chart.

A project which covers the learning from above mentioned concepts in various unit will be carried out by the student taking data from the annual report of a company/ Government publications along with interpretations and will be submitted to the subject teacher for evaluation

Master of Commerce under Five Years Integrated Programme (Semester IV)
(Credit Based Continuous Evaluation and Grading System)
Session: 2025-2026
Course Title: Business Economics
Course Code: FCOL-4173

Course Outcome: On completion of this course, the students will be able to:

CO1: Gain a comprehensive understanding of managerial economics and its application in business decision-making, with a focus on the concepts of demand, supply, and their influence on price determination.

CO2: Explore consumer behavior theories and analyze the relationship between production processes and cost structures.

CO3: Acquire knowledge of macroeconomic principles, including the circular flow of income and various methods used to estimate national income.

CO4: Study the consumption function, understand the nature and phases of business cycles, and examine the causes of inflation along with possible remedial measures.

Master of Commerce under Five Years Integrated Programme (Semester IV)
(Credit Based Continuous Evaluation and Grading System)
Session: 2025-2026
Course Title: Business Economics
Course Code: FCOL-4173

Time: 3 Hours

L-T-P (Credits): 4-0-0

Max. Marks: 100

Theory: 70

CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit- I

Introduction to Managerial Economics: Meaning, Features and Significance of Managerial Economics, Scope of Managerial Economics.

Fundamental Concepts used in Business Decisions: The Opportunity Cost and Decision Rule, Marginal Principle and Decision Rule, Incremental Principle and Decision Rule, Contribution Analysis, Equi-Marginal Principle, Time Perspective in Business Decisions.

Basics of Demand and Supply: Demand, Law of Demand, Supply, Law of Supply; The Market Mechanism, Changes in Market Equilibrium, Elasticity of Demand and Supply.

Unit- II

Theory of Consumer Behaviour: Cardinal Approach to Consumer Equilibrium, Measurement of Utility, Law of Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Approach to Consumer Equilibrium; Indifference Curves, Indifference Maps, Properties of Indifference Curves, Marginal Rate of Technical Substitution, Budget Constraints: The Budget Line, Effects of Changes in Income and Prices on Budget Line, Income, Substitution and Price Effects.

Production: The Production Function, Short Run vs. Long Run, Production with One Variable Input, Production with Two Variable Inputs: Meaning, Types and Properties of Isoquants, Isoquant Map, Ridge Lines, Input Prices and Cost Line, Optimal Combination of Inputs, Expansion Path, Returns to Scale.

Cost: Types of Cost, Short-run and Long-run Cost Curves, Modern Theory of Cost, Economies and Diseconomies of Scale.

Unit- III

Macroeconomics for Business Decisions: Meaning and Nature of Macroeconomics, Importance of Macroeconomics, Origin and Growth of Macroeconomics.

Circular Flow Model of Economy: Circular Flows in Simple Economy Model, Circular Flows of Product and Money in Three Sector Economy, Circular Flows in Four Sector Model.

National Income: Definition of National Income, Measures of National Income, Methods of Measuring National Income, Problems in Measurement of National Income.

Unit- IV

Consumption Function: Meaning of Consumption Function, Determinants and Measures to Raise Propensity to Consume, Keynes Psychological Law of Consumption - Meaning, Properties and Implications.

Inflation: Meaning of Inflation, Methods of Measuring Inflation, Types – Demand Pull Inflation and Cost Push Inflation, Causes, Effects and Control of Inflation.

Business Cycles: Phases of Business Cycles, Features of Business Cycles, Theories of Business Cycles.

Suggested Readings:

1. Koutsoyiannis, A, Modern Micro Economics, Palgrave Macmillan Publishers, New Delhi, 2nd edition, 2003.
2. Thomas Christopher R., and Maurice S. Charles, Managerial Economics - Concepts and Applications, 8th Edition, Tata McGraw Hills, 2005.
3. Mehta, PL, Managerial Economics–Analysis, Problems and Cases, Sultan Chand & Sons, Delhi, 20th edition, 2016.
4. Peterson and Lewis, Managerial Economics, 4th Edition, Prentice Hall of India Pvt. Ltd. New Delhi, 2005.
5. Shapiro, Macro Economics, Galgotia Publications, 5th edition, 2013.
6. Ahuja, H.L, Advanced Economic Theory, Microeconomic Analysis, S. Chand & Co. Ltd, New Delhi, 21st edition, 2018.
7. Gupta, G.S, Managerial Economics, Tata McGraw Hill, 2nd edition, 2011.

Note: Latest edition of textbooks to be used.

Master of Commerce (Semester-I)
Session 2025-2026
Course Title: Managerial Economics
Course Code: MCML-1171

Course outcomes:

After passing this course, students will be able to:

CO1: Understand the concepts of managerial economics and, theory and elasticity of demand.

CO2: Understand in-depth knowledge of theories of consumer behaviour and production function.

CO3: Understand the theories of cost and market structure

CO4: Understand the concept of national income, consumption function and Inflation.

Master of Commerce (Semester-I)
Session 2025-2026
Course Title: Managerial Economics
Course Code: MCML-1171

Time: 3 Hours

L-T-P (Credits): 4 -0-0

Max. Marks: 100

Theory: 70

CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit-I

Managerial Economics: Meaning, Nature, Scope and Concepts.

Law of Demand: Meaning, Determinants, Exceptions, Kinds of Demand, Change in Demand and Importance of Law of Demand.

Elasticity of Demand: Meaning, Types and Degrees of Elasticity of Demand, Methods of measuring Price Elasticity of Demand, Factors Determining Elasticity of Demand, Importance.

Unit-II

Marginal Analysis: Law of Diminishing Marginal Utility, Law of Equi-marginal Utility

Indifference Curve Analysis: Meaning, Assumptions, Properties, Consumer Equilibrium, Importance.

Production Function: Meaning, Law of Variable Proportion and Law of Returns to Scale Economies and Diseconomies of Scale.

Unit-III

Theories of Costs: Types of Costs, Traditional Theory: Long Run & Short Run, Modern Theory: Long Run & Short Run.

Managerial Theories: Profit maximization and Sales Maximization.

Market Structure: Meaning, Assumptions and Equilibrium of Perfect Competition, Monopoly, Monopolistic Competition.

Oligopoly: Sweezy Model.

Unit-IV

National Income: Conceptual Framework, Measures of National Income, Methods of Measurement of national income and Limitations/problems in measurement of national income, importance of measurement of national income

Consumption Function: Meaning, and Nature, Determinants and Measures to Raise Propensity to Consume, Keynes Psychological Law of Consumption – Meaning, Properties and Implications.

Inflation: Meaning, Types, Theories of Inflation, effects and control of Inflation.

Suggested Readings:

1. Ahuja, H. L. (2009), Modern Micro Economics , Sultan Chand and Co.

2. Koutsyannis A. (1977), '*Modern Microeconomics*', 2nd Edition, Macmillan Press, London.
3. Mithani, D.M(2009), '*Managerial Economics*', 5th Edition Himalaya Publishing House, New Delhi.
4. Adhikari, M., *Economic Analysis for Business Decision*.

Note: The latest edition of the books is recommended.

Master of Commerce (Semester-I)
Session 2023-24
Course Title: Statistical Analysis for Business
Course Code: MCMM-1095

Course Outcomes:

After successful completion of this course, students will be able to –

CO1: understand the concept of Probability theory and distributions.

CO2: analyze the techniques of data collection (primary and secondary).

CO3: ways of questionnaire designing and formulation of hypothesis.

CO4: identify, use and interpret the results of statistical tools and techniques

3-0-2

Max. Marks: 100
Theory: 50
Practical: 20
CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 10 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit-I

- Probability Theory: Probability—classical, relative, and subjective probability; Addition and multiplication probability models.
- Probability Distributions: Binomial, Poisson, and normal distribution, their characteristics and applications.

Unit-II

- Sampling and Data Collection: Sampling and sampling (probability and non-probability) methods; Sampling and non-sampling errors.
- Primary data collection techniques; Survey and Observation methods: Secondary data sources; Commercial (Syndicated) and Non-commercial sources.

Unit-III

- Questionnaire design
- Hypotheses testing; Null and alternative hypothesis, type I and type II error.

Unit-IV

- Large and small sampling tests—Z tests, T tests, and F tests. ANOVA (one-way and two-way), Chi-square test.
- Correlation: Simple, partial and multiple correlation coefficients.

Practical through SPSS:

The students will be trained in the following techniques of data analysis using latest version of SPSS software. At the end of the semester, external examiner will be appointed by the University to conduct the practical by examining the students in the lab and award marks.

Instructions for Practical Examiner: Question paper is to be set on the spot by the Internal Examiner. Two copies of the same should be submitted for the record to COE Office, Kanya Maha Vidyalaya, Jalandhar.

Topics: Z tests, T tests, and F tests. ANOVA (one-way and two-way), Chi-square test, correlation.

Suggested Readings:

1. Sharma, J.K., “Business Statistics”, 2nd edition (2007), Dorling Kindersley (India) Pvt. Ltd.
2. Hooda, R.P, “*Statistics for Business and Economics*”, 2003, Macmillan, New Delhi.
3. Heinz, Kohler, “*Statistics for Business & Economics*”, (2002), South-Western / Thomson Learning.
4. Hien, L.W, “*Quantitative Approach to Managerial Decisions*”, Prentice Hall, New Jersey,
5. Mc Clave, J. T.; Benson, P.G. and Sincich, T., “*Statistics for Business & Economics*”, 11th edition (2011), Pearson.

Masters of Commerce(Semester-II)
Session: 2023-24
Course Title: Research Methodology
Course Code: MCMM–2095

Course Outcomes:

After successful completion of this course, students will be able to

CO1: formulate and define the research problem.

CO2: identify various sources and ways of writing literature review and also provide knowledge of concepts and principles of experimental designs.

CO3: identify, use and interpret the results of comparative and non-comparative scaling techniques.

CO4: understand the data preparation, process, interpretation and application of various data analysis techniques

Masters of Commerce (Semester-II)
Session: 2023-24
Course Title: Research Methodology
Course Code: MCMM–2095

Time: 3 Hours
Hours per week

3-0-2

Max. Marks: 100
Theory Marks: 50
Practical: 20
CA: 30

Note: Instructions for the Paper–Setter:

Two questions, each carrying 10 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit-I

- Research methodology: Nature and scope; problem, formulation and statement of research objectives. Research process.
- Choose a Research Topic.

Unit-II

- Review of Literature Goals of a Literature Review, Types of Reviews, Sources of Research Literature.
- Writing of Review.
- Research designs: Exploratory, descriptive and Causal designs (Basic designs—After only, Before After, After along with control group, Before after with control group, Time series designs).

Unit-III

- Measurement: concept, Levels of measurement—Nominal, Ordinal, Interval and Ratio.
- Attitude Measurement: Comparative and Non-comparative scaling techniques, Tabulation and cross-tabulation of data.

Unit-IV

- Data Preparation, Analysis, and Interpretation. Data preparation, Data screening, Transforming data, Data Analysis and Interpretation
- Data analysis techniques: Multiple regression analysis, Logistic regression analysis, Discriminant Analysis, Factor Analysis.

Practicals Through Spss:

The students will be trained in the following techniques of data analysis using latest version of SPSS software. At the end of the semester, external examiner will be appointed by the University to conduct the practical by examining the students in the lab and award marks.

Topics: Data preparation, Data screening, Transforming data, Data Analysis and Interpretation, Multiple regression analysis, Logistic regression analysis, Discriminant analysis and Factor analysis

Instructions for Practical Examiner: Question paper is to be set on the spot by the Internal Examiner.

Two copies of the same should be submitted for the record to COE Office, Kanya Maha Vidyalaya, Jalandhar.

Note: Instructions for the Paper–Setter:

Two questions, each carrying 16 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit I

Commercial Banks-Introduction, evolution, nature, functions, importance and services provided by Commercial Banks.

Types of Banks-Commercial Bank, Regional Rural Banks, Foreign Banks, Cooperative Banks, Public bank and Private bank.

Unit II

Central Bank—Meaning and Functions, Techniques of Credit Control, mechanism of Credit Creation.

Practical Aspect of Banking- Negotiable Instruments— Cheques, Bills of Exchange and Promissory Notes, endorsements, difference between Cheques and Bills of Exchange.

Unit III

E-Banking- Electronic Transfer of Funds(NEFT,RTGS)

Internet Banking-Mobile Banking, Wholesale and Retail banking, Universal and Narrow Banking, Off Shore Banking

Clearing House System

Unit IV

Systems of Banking-Group and Chain Banking, Unit and Branch Banking, Investment Bank

Prudential Norms for Asset Classification (NPAs)-Income recognition and provisioning, KYC Norms

Two questions, each carrying 16 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit I

Introduction to Indian Financial System: Meaning, Significance, Purpose and Organization, Liberalization of Financial system

Financial Markets: Introduction, classification.

Unit II

Capital Market: Meaning and features of Capital Market

New Issue Market: Functions, Methods of floating new issues, Operations in New Issue Market, Problems.

Secondary Market: NSE,OTCEI,

Stock Exchange: Definition, Functions, Management and Organisation

Unit III

Money Market: Meaning and Structure, Functions of Money Market in India, Growth of Indian Money Market, Capital Market Vs. Money Market, Money Market Participants, Defects of Indian Money Market, Requisites of a Developed Money Market, the Indigenous Bankers and Money Lenders

Call Money Market: Meaning, Features, Benefits, Indian Call Money Market– A Profile, Participants.

Unit IV

Introduction to Financial Services: Meaning, Nature, Types, Importance of Financial Services. The changing environment of financial services.

Overview of Merchant Banking, Mutual Funds and Credit Rating Agencies.

Two questions, each carrying 7 marks, from each of the Units I-IV (i.e. a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

Unit-I

Introduction to Managerial Economics: Introduction, Concept, Scope, Significance of Managerial Economics.

Distinction Between Economics and Managerial Economics, Role of Managerial Economics & Major Economic Problems & Tools of Managerial Economics, Functions of Managerial Economist.

Unit-II

Demand and Supply: Introduction, Concept of Demand, Law of Demand, Change in Demand & Quantity Demanded, Concept of Supply, Law of Supply, Demand & Supply Equilibrium.

Elasticity of Demand and Supply: Price Elasticity of Demand, Measurement, Factors Influencing Price Elasticity of Demand. Income Elasticity of Demand, Cross Elasticity of Demand. Elasticity of Supply, Factors Determining Elasticity of Supply.

Unit-III

Production & Cost function: Production Function, Short run Production, Long run Production, Producer's Equilibrium, Types of Production Function. Concept of Cost, Type of Cost in Long run and Short run.

Unit-IV

Market Dynamic: Elements of Competition, Perfect Competition, Monopoly & Price Discrimination, Imperfect Competition & Duopoly.

Role of Government in an Economy: Introduction, Requirement of Government Intervention in an Economy, role of Govt. in Different Economic Systems and Policies.

Suggested Readings:

1. Mehta, P.L. (2013), *Managerial Economics*, S. Chand & Sons Company Ltd., New Delhi.
2. Ahuja, H.L. (2018), *Advanced Economic Analysis*, S. Chand & Co. Ltd, New Delhi.

**Bachelor of Business Administration – Airlines and Airport
Management Semester-III
(Session 2025-2026)
Subject: Basics of Statistics
Course Code: BBML- 3711**

Course Outcome: After successful completion of course, students will be able to

CO1: understand fundamental statistical concept of statistics, sampling techniques and the methods to collect, organize, and summarize data.

CO2: Interpret and visualize data using graphs and charts.

CO3: Apply measures of central tendency and dispersion to make informed decisions based on data.

CO4: Understand and apply the concept of skewness to analyze the spread and asymmetry of statistical data , compare magnitudes of related variables over a period of time using index numbers.

Bachelor of Business Administration – Airlines and Airport

Management Semester-III

(Session 2025-2026)

Subject: Basics of Statistics

Course Code: BBML- 3711

Time: 3 Hours

L-T-P: 4-0-0

Maximum Marks: 100

Theory Marks: 70

CA: 30

Note: Instructions for the Paper Setter:

Two questions, each carrying 14 marks, from each of the Units I-IV (i.e., a total of eight questions) are to be set. Candidates are required to attempt five questions, selecting at least one from each unit. The fifth question may be attempted from any unit.

UNIT-I

Statistics: Definition, Scope of statistics, Functions and Limitations of Statistics

Census and sampling methods, Population vs. Sample, Types of sampling methods- Probability and Non-probability sampling methods.

Methods of data collection: Primary and Secondary data collection methods.

UNIT-II

Presentation of data; Data classification and tabulation, Frequency distribution tables,

Diagrammatic and Graphical representation of Data: Bar graphs, Pie charts, Histograms, Frequency Polygon and Ogives (cumulative frequency curves).

UNIT-III

Measures of Central Tendency: Arithmetic mean, Median, Mode., Comparison and uses.

Measures of dispersion: Range, quartile deviation, Mean deviation and Standard deviation. Variance and coefficient of variation.

UNIT-IV

Skewness: Karl Pearson's method, Bowley's method and Kelly's method.

Index Numbers: Price Index Numbers–Weighted and Unweighted Index Numbers, various formulae and consistency tests.

Suggested Readings:

1. Sharma, J.K., "Business Statistics", 2nd edition (2007), Dorling Kindersley (India) Pvt. Ltd.
2. Hooda, R.P., "Statistics for Business and Economics", 2003, Macmillan, New Delhi.
