Subject: Invitation to participate as Resource Person in Industry- Academia e-symposium on 6th March, 2021 organized by Kanya Maha Vidyalaya(KMV), Jalandhar

Dear Sir

Greetings from Kanya Maha Vidyalaya!

It is a pleasure to intimate that we are organising an Industry-Academia e-Symposium on March 6, 2021.

We at KMV have been associated with the Media and Entertainment Skills Council(MESC) since the year 2015, when Skill Development Centre - DDU Kaushal Kendra was set up and vocational courses were introduced including one in Animation. Since then experts from MESC have been instrumental in Syllabus alignment, participation in events like Industry-Academia meet and assessment of our students. Moreover our students have gained a lot from various expert lectures organised under Vidyadaan, an initiative of MESC.

Your participation as a resource person in the event is of immense importance to us and will be a great source of inspiration to our students and participants to hear and learn from an eminent leader having more than 18 years of experience in the Media and Entertainment Sector.

The program will be conducted on e-conference platforms like Zoom, Google Meet, etc. (link will be shared in time).

We believe this date will suit you and we shall be greatly thankful if you could convey your acceptance at the earliest.

Warm Regards
Dr. Gopi Sharma

Dear Sir,

Greetings of the day !!

Kanya Maha Vidyalaya (Autonomous), the pioneer institution of women's education, has long been recognized as a premier center of higher learning for women in North India. Re-accredited "A" by NAAC (National Assessment and Accreditation Council, Bangalore), the college strives ceaselessly to emancipate, enlighten and empower women. Education at K.M.V. is a unique amalgam of traditional learning and futuristic vision.

It is an immense pleasure that **Kanya Maha Vidyalaya, Jalandhar**, is organizing an **"Industry-Academia symposium"** on 06 March 2021.

As you are one of the known speakers on the topic, your deliberation and participation will surely benefit the participants from the **Media and Entertainment Sector**.

I am writing this to inquire whether it would be possible for you to be one of the speakers in the symposium. You are free to choose one of the aspects of the topic for your talk.

Many of the guest speakers have already accepted the invitation. Each speaker's time will be 10 minutes and will be followed by 5 minutes of common discussion.

The program will be conducted on e-conference platforms like Zoom, Google Meet, etc. (link will be shared in time).

We believe this date will suit you and we shall be greatly thankful if you could convey your acceptance at the earliest.

Your response will be highly appreciated in this regard.

Retailers Association's Skill Council of India(RASCI)

Ms Nika Gupta, operations head, centre skill council RASCI impressed with the retail lab at Kmv, emphasised on the skills required to succeed in retail field and how the curriculum adopted in Kmv is in tune with the requirements of retail industry . She also suggested that the college shall provide mentorship to various colleges in region who are offering B. Voc and M. Voc retail management who are not aware of how important it is to have course designed in tune with industry standards. She also discussed role of NEP in giving impetus to vocational programmes.

Mr. Krishna, store manager Pantaloons Jalandhar emphasized to have students well adapt in using technology and how retail technologies are evolving and need of students to continually hone their technical skills. He also guided students on various career avenues that they can opt for after doing their degree in retail management.

Mr Anuj marketing head Kapsons, Jalandhar applauded KMV college for regularly arranging industry academia meets and revising its syllabus on regular basis to impart quality education.

Apart from the above, faculty training in the industry, industrial visit of students and various other aspects were discussed in the meet to make the students industry ready.

The meet ended with the concluding remarks and vote of thanks by Prof. (Dr.) Gopi Sharma, Director, DDU Kaushal Kendra KMV.

Dear Malavika,

Hope you are well and things are looking better at the university during this difficult time. We are beginning with the new session very soon and intend to introduce the Writing Program as discussed with you the last time. I am sharing with you a preliminary outline of the program from our side and would appreciate your inputs/feedback/suggestions on the same. We tried including many of the pointers that came up during our last meeting, including portfolio writing. Looking forward to hearing from you soon.

Take care,
Warm regards,

Dear Madhumeet,

Hope you and your family are well. Sorry for the delay in getting back to you. I was away on a camping trip for the long 4th of July weekend with no access to my computer and to wifi. I am now back in Boston and am happy to see the Writing Program outline. It really looks wonderful!

I have made a few suggestions on the document related to technical writing and to presentations. Feel free to ignore the suggestions if those are components you do not want to include in the program at this point.

I hope everyone in the KMV family is doing well!

With all best wishes,

Malavika

Retail Management

Training of Trainers (TOT) for Conduct of Online SSC Exam by RASCI (03.06.2020)

Kanya Maha Vidyalaya- The Heritage and Autonomous Institution, has always made a landmark contribution to impart value-based education to its students and always foster initiatives for growth and development of the students. Even during the breakdown of Covid-19 pandemic, KMV has emphasised on learning activities so that the students do not remain deprived from any required skill. Focusing on this motto, Faculty of Retail Management Department attended Training of Trainers (TOT) for conduct of online Sector Skill Council (RASCI) Assessment which was conducted by Mr. Monojoy Banerjee, Assessor, Aspiring minds (Assessing agency) under Retailers Association's Skill Council of India.

Retail Management Department was the first one who has taken the initiative to conduct the sector skill exam of students which were earlier used to conduct offline in college. The faculty learned about the standardized structure of TOT models and the process of assessment. They were also acquainted with the Domain Skills and Platform Skills to handle the technical glitches that occur during the assessment of the exam. A detailed overview of this evaluation system was demonstrated by Mr. Banerjee. He also cleared the doubts of the faculty members regarding online assessment. Ms. Rashmi Sharma, Incharge of Retail Management Programme thanked Mr. Banerjee for such smooth conduct of session. Principal Prof. Dr. Atima Sharma Dwivedi applauded the effort of Retail Management Faculty and congratulated them for this endeavour.

Our respected Principal Prof Dr Atima Sharma Dwivedi was thankful for the valuable inputs delivered by Shri Varun Nayyar, CEO Digital Adda and she is appreciative of the commendable efforts taken by the Department of Retail Management for initiating such a knowledgeable and informative session.

Finally, our HoD Dr. Rashmi Sharma expressed her gratitude towards the Management of the College for their constant support and encouragement to attend such enriching sessions. She further thanked them for their exemplary efforts in providing such platforms to the Principal, the Teachers and the Students and help them reach great heights of success.

Online Workshop “Career opportunities in Retail Sector”

Date: 4 June 2021

An exclusive workshop session for the students of Retail Management Department was organized by KMV College on the topic “Career opportunities in Retail Sector” scheduled on 4 June 2021 in its endeavors to create awareness among students about the enormous career opportunities available in retail sector. The session was presided over by Mrs. Alisha Sareen-Chief Financial Advisor/Partner Sareen Lingua World, Jalandhar, who firstly commended KMV College for their continuous efforts of educating students such as counselling them about job opportunities open to them after their degree in retail management. She further went on to give a vivid outlook of how with new ongoing developments in retail the job opportunities have increased manifold in almost all spheres of retail at large and in few segments by almost 1000 %.

This crucial session was graced by our respected Principal Prof. Atima Sharma Dwivedi and was attended by faculty of retail management under leadership of our respected Dr. Rashmi Sharma HOD Commerce and Retail Management Department KMV College Jalandhar. She was elated with the manner in which workshop was conducted and how suggestions and ideas that was discussed in the session by Mrs. Alisha Sareen-Chief Financial Advisor/Partner Sareen Lingua World, Jalandhar. She discussed and guided students about the career avenues and their progression that would be opened to students after their successful completion of their programmes. And how they could further strengthen their resolve of progressing in the retail field creating Awareness among the students. She further threw light on the fact that Colleges should now be prepared to keep their students updated about the relevant career choices available to students after their programme completion. The session went on to be more informative as she discussed about the topic in detail.

Our respected Principal Prof Dr Atima Sharma Dwivedi was thankful for the valuable inputs delivered by Mrs. Alisha Sareen-Chief Financial Advisor/Partner Sareen Lingua World, Jalandhar and she was appreciative of the commendable efforts taken by the Department of Retail Management for organizing such a knowledgeable and informative workshop session.

Finally, our HOD Dr Rashmi Sharma expressed her gratitude towards the Management of the College for their constant support and encouragement to attend such enriching sessions. She further thanked them for their exemplary efforts in providing such platforms to the Teachers and the Students and help them reach great heights of success.

नकारात्मक सोच को नियंत्रित करना जरूरी : डा. सूरि

जालंधर, 6 अक्टूबर (विनोद): कन्वेंशन महाविद्यालय के साइकोलॉजी विभाग की ओर से 'वर्ल्ड मेंटल हेल्थ' के अवसर पर 'मैनेजिंग फीयर एंड एंग्जाइटी द्यूरिंग क्राइसिस' विषय पर 6 दिवसीय वीडियो करवाया गया, जिसमें डा. शिल्पा सूरि (पाजिटिव साइकोलॉजी प्रैक्टिशनर) ने खतरा रिस्केस परसन शामिल होकर अपने विचार रखे।

डा. सूरि ने चिंतन एवं डर की अवधारणाओं को बर्णन करते हुए कहा कि हमें अपनी

भावनाओं को पहचानते हुए इन पर नियंत्रण रखने की कला का ज्ञान होना चाहिए। आत्म जागरूकता को उन्होंने आत्मवृद्धि का पहला पड़ाव बताते कहा कि हमें अपनी भावनाओं को न बदलते हुए नकारात्मक सोच को नियंत्रित करना चाहिए।

प्रि. डा. आतिमा शर्मा द्विवेदी ने डा. सूरि का अभार व्यक्त करते कहा कि कोविड-19 महामारी के मौजूदा समय में सभी का मानसिक तौर पर स्वस्थ होना बहुत जरूरी है। इसके लिए कॉलेज स्तर पर होने वाले ऐसे वीडियो छात्राओं के लिए काफी फायदेमंद साबित होते हैं।

डॉ. शिल्पा सूरि ने चिंता एवं डर की अवधारणाओं को प्रभावशाली अंदाज से बयान किया

जालंधर, 6 अक्टूबर (कुल): भारत की विरासत संस्था कन्वेंशन महाविद्यालय, जालंधर के संस्थापक डॉ. केशव कुमार शर्मा के नेतृत्व में 2020 में टॉप वैजुअल व इंटरैक्टिव ड्राफ्ट, महिला समन्वयक की ओर, कन्वेंशन महाविद्यालय के सी.सी. डिपार्टमेंट ऑफ साइकोलॉजी के द्वारा वर्ल्ड मेंटल हेल्थ डे के अवसर पर छह दिवसीय प्रोग्राम का मैनेजिंग फीयर एंड एंग्जाइटी द्यूरिंग क्राइसिस विषय पर वीडियो का अंशकालिक तथा जिसमें डॉ. शिल्पा सूरि, सी.सी. डिपार्टमेंट ऑफ साइकोलॉजी प्रैक्टिशनर, वीडियो डिपार्टमेंट फोरमैटर तथा लक्षक अभिराम देवर ने छह सप्ताह के रूप में शामिल की। वीडियो में 100 से अधिक प्रतिभागियों को संबोधित करते हुए डॉ. शिल्पा सूरि ने चिंतन एवं डर की अवधारणाओं को प्रभावशाली अंदाज से बयान किया और साथ ही उन्होंने भावनाओं को छे बिगड़े प्रभावशाली एवं इच्छाओं के बारे में भी बात की। उन्होंने कहा कि हमें अपनी भावनाओं को पहचानते हुए इन पर नियंत्रण रखने की कला का ज्ञान होना चाहिए। आत्म जागरूकता को उन्होंने आत्मवृद्धि का

Thirteen Weeks Online classes on the Course "Health Psychology" by Dr. Robert Urban

INDO-HUNGARIAN CLASSES AT KMV

Jalandhar: Kanya Maha Vidyalaya has initiated an international series of Indo-Hungarian classes. Online international classes have commenced for the students of psychology in which they are studying health psychology from Dr Robert Urban, eminent prof from the prestigious Eotvos Lorand University, Hungary. A memorandum of understanding was signed recently when KMV Principal Prof Atima Sharma Dwivedi visited Eotvos Lorand University, Hungary. Every week Dr Robert Urban interacts with the students and also provides online videos, presentations and study material to them. Psychology students have interactive classes with Dr Robert where he discusses the concepts in detail and also dispels the doubts of the students. Through these active online classes students are learning how to enhance one's health and well-being even during adverse conditions and are enriching their intellect and are also getting an immense international exposure. Principal Prof Dwivedi averred that this exchange programme has received much appreciation from the students.

Abstract

Present study report the influence of distribution of gold nanoparticles on optical properties of bismuth-borate glass. The glass with the composition $30\text{Bi}_2\text{O}_3:70\text{B}_2\text{O}_3$ was first melted and in this glass matrix, 3×10^{11} number of gold nanoparticles of 10 nm size were incorporated within the glass matrix using three different methods: drop casting method, sandwich method and melt quenching at room temperature. In the very first method, after pouring the liquid glass sample, drops of gold nanoparticles were poured on the top of the melt and placed for annealing. While in sandwich method pouring of first half of the sample followed by pouring of nanoparticles were carried out and then remaining molten glass was poured on it. For melt quenching method, the appropriate weight of chemicals along with gold nanoparticles were mixed and melt was poured at room temperature. These three different methods were adopted to get functional properties in glasses for achieving better optical and electronic properties. The prepared glass matrices were analysed using X-ray diffraction spectroscopy (XRD), field emission scanning electron microscopy (FESEM), Differential thermal analysis (DTA), UV-Vis-NIR spectroscopy, Fourier transform infrared spectroscopy (FTIR) and Tera-hertz time domain spectroscopy (TDS). XRD confirm the invariability of amorphous nature while FESEM images shows a large variation in the morphology and size of gold nanoparticles inside the glass matrix. The results show that morphology of gold nanoparticles inside the glass is highly dependent on the method adopted for preparation of glass.

1 Introduction

Nanoparticles find several application in approximately every field of optics, electronics and medical. Enhanced surface to volume ratio, surface activity and quantum size effect of these nanostructures make them more significant than their respective bulk material. Glasses containing nanoparticles particularly of gold, silver and copper exhibit wide range of interesting properties like ultrafast nonlinear optical response, large third order nonlinear susceptibility, ultrafast optical switching in THz region etc. [1–5]. The challenges faced for the production of glasses containing noble metal nanoparticles is the achievement of uniform distribution

inside the bulk matrix, coagulation of nanoparticles and loss of nanoparticles due to high heat while fabricating the glass. These factors are highly influenced by choice of fabrication method, composition selection and precursors for nanoparticles (i.e. whether the nanoparticles are prepared from salt inside the glass or as prepared nanoparticles are used).

It is a well-studied that the properties (optical, structural, electrical etc.) of any material are highly dependent on the route of fabrication. Same is the case with glasses. From the last few decades, several different methods have been proposed to incorporate/produce metallic nanoparticles inside the vitreous material. Almeida et al. [6] have successfully generated copper nanoparticles inside the glassy

Influence of heat treatment on spectroscopic and structural properties of vitreous Er^{3+} -doped zinc borotellurite

ABSTRACT

The effect of heat treatment on spectroscopic and structural properties of Er^{3+} -doped zinc borotellurite glasses (TBZEr_x) is studied in the light of absorption, emission, x-ray diffraction and field emission scanning electron microscopy. An increase in thermal stability factor (ΔT) with increasing erbium ion (Er^{3+}) is observed. X-ray diffraction (XRD) confirms the existence of α - TeO_2 and $\text{Er}_2(\text{TeO}_6)_3$ phases in vitreous samples after heat treatment. The band gap and Urbach energy decrease after heat treatment. The Judd-Ofelt parameters indicate high asymmetry in the environs of Er^{3+} ions. The CIE chromaticity coordinates for prepared samples lies in green region. While going from TBZEr_x to TBZEr_xGC , an increase in lifetime values is observed for same rare earth (RE) concentration. An increase in the emission intensity and up-conversion intensity is observed after ceramization. The higher spectroscopic properties like stimulated emission cross-section ($\sigma_{\text{em}}/\lambda$), lifetime (τ) and quantum efficiency (η) values of TBZEr_xGC than TBZEr_x , suggests their suitability for photonic applications.

1. Introduction

Lanthanide (Ln^{3+}) doped glasses are potential materials for fiber amplifiers and lasers [1–5]. The introduction of Ln^{3+} ions into different vitreous matrices is considered as a vital aspect in the advancement of glass materials based optical devices, for instance temperature sensors and near infrared (NIR) lasers etc. [6–8]. One of the important approaches to obtain fiber lasers is the use of up-conversion processes in order to obtain the NIR to visible laser emission. The Up-conversion (UC) in Er^{3+} ions is possible due to the existence of metastable energy

levels and nano-glass-ceramics of low phonon energy without using heavy metal fluorides like PbF_2 and CdF_2 . The addition of boron to glass system increases phonon energy of system that makes UC process challenging. Thus, ceramization may be a good option to get the low phonon energies for UC [9,11]. Several reports suggest that properties like luminescence quantum yields, broad bandwidths and attenuation coefficients of the oxyfluoride glass systems get improved when nanocrystals are present in the systems [2,5,6,14,20], hence, improving their potential as new functional materials in the field of photonics. But there are few reports [3,14] on rare earth doped borotellurite glass ceramics.

Feasibility study of a chlorophyll dosimeter for high energy X-ray beam used in radiotherapy

Abstract

Chlorophyll extracted from *Mangifera indica* leaves in acetone (80%) has been explored for its feasibility as a radiation dosimeter in therapeutic X-rays. The UV–VIS spectroscopic analysis of the irradiated samples shows a decrease in optical density at 664 nm with an increase in the X-ray dose. A linear response has been observed up to 2 Gy (Pearson's correlation coefficient is 0.90), and a supralinear trend thereafter. The dosimeter has been found to be energy dependent and dose rate independent. The chlorophyll molecule has shown the potential to be used as a radiation dosimeter.

Keywords Chlorophyll dosimeter · Radiotherapy · Chemical dosimetry · UV–VIS spectroscopy

Introduction

The radiation dose in radiotherapy is measured by a wide variety of active and passive detectors [1]. The most common categories include air-filled ionization chambers, semiconductor detectors, diamond detectors, thermoluminescent and optically stimulated luminescent dosimeters and chemical dosimeters [2–4]. The chemical dosimeters are based on the quantitative measurement of chemical changes after the completion of a series of radiation induced reactions [5]. One of the most commonly used chemical dosimeters is the Fricke dosimeter. The change in concentration of ferrous

[10, 11]. The absorbed photons either ionize or excite the chlorophyll molecules. The excited molecule de-excites back to the ground state by emitting light photons. The ionization results in the ejection of an electron, while several by-products are formed by distinct changes in the chlorophylls [12].

The ultraviolet-visible (UV–VIS) absorption spectra of chlorophylls show the absorbance peaks in the blue region around 430 nm, 470 nm, and in the red region around 664 nm mainly due to the delocalized pi-electron cloud of the chlorophyll molecules [13]. For pure chlorophylls, in the yellow-green region, the absorbance is less than 10% of the absorbance maxima in the red region as shown in Fig. 1

Abstract: Variations in crystalline structure, optical property, structural bonding in Graphene Oxide (GO) doped polypyrrole (PPy) under gamma irradiation at 100 KGy with effective dose rate of 2.86 KGy per hour have been studied. The crystalline structure has been studied utilizing XRD spectroscopy and it has become clear that as compare to non-irradiated, irradiated sample show more shift toward crystalline nature, this is because of the decrease in d -spacing. The variation in optical properties have been evaluated using UV-VIS spectroscopy, it has been pointed that gamma irradiation reduces the optical band gap due to the chemical reactions, such as chain scissioning etc., induced by gamma exposure, this result is further supported by FT-IR spectroscopy.

Free-standing thin films of polyaniline (PANI) with polyvinyl chloride (PVC) were synthesized and studied for variations in the structural, optical, and thermal properties with changing polyaniline concentration in the composites. Fourier transform infrared spectra show interactions between polymeric entities. XRD shows an increase in peak intensities with polyaniline with an exception at 50% polyaniline content. SEM micrographs verify the morphological changes of the composites. The reduction in chain length of composites with increased concentration of PANI is supported by the shift in absorption edge of UV-VIS spectra towards longer wavelengths. A reduction in direct and indirect band gaps and Urbach's energy with increasing PANI concentration was observed. A monotonic increase in the intensity of photoluminescence with PANI concentration was observed with an exception for 40% polyaniline content. The glass transition temperature (T_g) for PANI/PVC composites showed a slow reduction with increased PANI concentration.

Evaluation of uranium and other toxic heavy metals in drinking water of Chamba district, Himachal Pradesh, India for possible health hazards

Abstract

Uranium and other heavy metals are found in the natural water and may enter the human body when ingested by drinking water. Uranium being radioactive may provide radiological risks, whereas chemical toxicity of uranium and other heavy metals may pose a serious threat to human life. The current research has been undertaken for trace level analysis of uranium and other heavy metals (Fe, Zn, Cu, As, Co, Ag, Cd and Pb) in drinking water samples collected from different locations and sources of water from Chamba district of Himachal Pradesh, India. Uranium concentration has been assessed using LED fluorimeter, whereas the concentration of other heavy metals has been estimated utilizing inductively coupled plasma mass spectrometry (ICPMS). Uranium concentration in water samples have been found to vary from 0.50 to 90.46 $\mu\text{g L}^{-1}$ with mean value of 6.51 $\mu\text{g L}^{-1}$. About 96% samples have uranium concentration lower than the suggested safe limits of 30 $\mu\text{g L}^{-1}$ by (WHO, Guidelines for drinking-water quality, World Health Organization, Geneva, Switzerland, 2017). The cancer mortality and morbidity risks have also been estimated using the uranium concentration in drinking water samples. The annual ingestion dose (AID) susceptible to distinct age groups due to ingestion of these waters has also been computed and is found above the prescribed dose of 100 $\mu\text{Sv y}^{-1}$ (International Commission on Radiological Protection, ICRP, (1999) Protection of the public in situations of prolonged radiation exposure: Ann ICRP 29(1–2), ICRP Publication 82) in the water sample of Behra for adolescents and adult males as well as for pregnant and lactating females. Lifetime average daily dose (LADD), Hazard Quotient (HQ) and Heavy Metals Pollution Index (HPI) due to the presence of heavy metals in drinking water samples have also been calculated. LADD for uranium, As and Fe have been found above the recommended limits in the drinking water samples of some villages. Average HQ of the study area has been observed below 1 indicate that the water is good for drinking purpose. HPI has also been found below the analytical pollution index of 100 indicate that the water of the area is not polluted.

Abstract. The present study has been aimed to analyze the concentration activities of ^{226}Ra , ^{232}Th and ^{40}K in soil samples collected from Pangri valley, Himachal Pradesh by means of gamma spectrometry with NaI(Tl) detector and has been found to vary between 39.61 to 79.72 Bq kg^{-1} with average of 57.66 Bq kg^{-1} , 32.8 to 66.57 Bq kg^{-1} with average of 49.69 Bq kg^{-1} and 495.62 to 653.85 Bq kg^{-1} with average of 579.41 Bq kg^{-1} , respectively. Radium equivalent activity in these samples has also been determined and observed lower than the maximum permissible value 370 Bq kg^{-1} , acceptable for the safe use. The average absorbed dose rate in air at 1 m height from the ground level has been found 81.43 nGy h^{-1} , while the average outdoor and indoor annual effective dose rate has been calculated as 0.099 and 0.40 mSv y^{-1} respectively. The estimation of excess life time cancer risk assessments suggests about 13 out of 10000 persons may get affected by carcinogenic diseases due

Structural, Morphological, Optical, Electrical and Agricultural Properties of Solvent/ZnO Nanoparticles in the Photodegradation of DR-23 Dye

Nowadays, in the field of modern technology, application of nanoparticles has an active role in basic and applied sciences. Herein, optimization of the shape and size synthesis of ZnO nanoparticles has been done by using different solvents, namely, isopropyl alcohol (IPA) and triple-deionized water (TDW). The influence of different solvents on the structural, morphological, optical, electrical and thermal properties has been analyzed. The observed morphology was in the form of a ZnO nanosphere with grain size in the range of 20–25 nm. Electrical properties confirmed that the prepared sample can be used for fabrication of charge storage devices with a capacitance range of 7–9 μF . Thermal study revealed that the prepared nanoparticles are useful for application in solar cells. ZnO nanoparticles prepared with TDW (solvent) have better optical properties than IPA, so the photocatalytic properties of synthesized nanoparticles (prepared by TDW) were investigated under

RESULT NOTIFICATION

Under the provision of Clause 5 & 6 of the Ph.D Regulations relating to the degree of Doctor of Philosophy, the Doctoral Committee under the Chairpersonship of Dean, Research & Sponsored Projects considered the reports of the examiners including that of viva-voce along with gist of the reports prepared by the Doctoral Committee for the award of degree of Doctor of Philosophy as under:-

Sr No	Name	Father's Name	Regn. No.	Dept./ School	Name of the Supervisor(s)	Topic	Date of Viva-Voce
1.	Ms. Shivani	Sh. Ashwani Kumar	901612017	School of Physics & Materials Science	Dr. O.P. Pandey & Dr. Gopi Sharma	Linear and Non-Linear Optical Properties of Nanoparticles Dispersed Novel Glasses	14.08.2020

Accordingly, Ms. Shivani has become eligible for the award of degree of Doctor of Philosophy and her result is being notified as decided by the Chairman Senate.

The thesis has been uploaded on dSpace and assigned handle No.<http://hdl.handle.net/10266/6002> dated 20.08.2020.

CIRCULAR

The meeting of the University Research Board in respect of **Ms. Sandeep Kaur, 901612023, Ph.D. student in the School of Physics and Materials Science** will be held on September 4, 2017 at 12:30 PM in the Seminar Room of SPMS.

The candidate will present her Research Proposal in the School of Physics & Materials Science.

All the members of the University Research Board are requested to make it convenient to attend the meeting.

All the faculty members are also cordially invited to attend the same.
