

Report on Mentoring (2022-23)

Mentoring Programme is designed to bridge the gap between teachers and students so that mentor can monitor the students' performance and shortcoming closely. In this direction small groups of students were formed (about 10-12 students per mentor) for learning. Teachers monitored their academic performance like MST exams, tests etc. Based on their weak points, teachers provided them with their inputs which helped them in the key areas like

- ❖ Take things one day at a time
- ❖ Set weekly goals
- ❖ Create a routine
- ❖ When taking notes, write down main ideas
- ❖ Consider starting a virtual group chat to study with classmates
- ❖ Having an honest conversation with family about a need for a dedicated space and time for learning and studying.
- ❖ Taking help of recorded lectures and also to resolve queries if any with their concerned teachers
- ❖ Taking extra classes to resolve the doubts
- ❖ Some students otherwise are intelligent but slow learners. so in small groups teachers were able to focus more closely on these students and students' performance was improved.

On the whole despite the challenges the mentoring of students helped a lot for career guidance, skill development, psychological and emotional support.
