* Library Management

- **Entry/Editing of Books**
Accession Number, Book Title, Classification, IBIN, DDC, Series, Author, Publisher, Distributor, Total pages, Price, Book Dimensions etc.
- **Searching of books**
Books are searched by providing partial information of the book like title/publisher/author. Full information of the selected book is provided i.e. Number of total copies along with accession number DDC and availability status.
- **Issue/Return/Reservation of books**
To issue/return/reserve a book, member id is provided on the bases of which list of books issued to the student is displayed. If limit of books to be issued is already over only Return button is enabled so that no member can be issued books more than limit specified. If books issued is none or less than limit of books, than only Issue button is enabled. Book can be reserved for a member if not available readily.
- **Members Management**
Member of the library are managed from the data already entered by the general office, no data is required to be entered again for membership of students or staff.
- **Other Reports.**

Hardware Requirements:
1. Computer P4, 1GB RAM

SERVICE THE BEST
[Why BSIM](#) [Our Product](#) [Downloads](#)

[BSIM -An Office administration/management System](#)

BitField Solutions Institute Manager (BSIM) is a unique product of BitField Solutions. The product is designed to meet requirements of administration office of an educational institute. Our motive is to automate every single job going in the administrative office of the institute to ease the office job with accuracy. Depending upon the functionality, the product is divided into three modules.

- * **Fee Management System**
- * **General Office Management System**
- * **Examination System**
- * **Hostel Fees Management**
- * **Accounts Management**
- * **Payroll System**
- * **Library Management**

All modules are incorporated with User Management at every level of the software as of security concern. Unauthorized access to the system is not possible at any level. Only administrator level user can perform user management which includes the following jobs:

1. Create new user
2. Delete existing user
3. Grant/Revoke permissions for the operations
