7. Explain the Behavioural aspects of sleep and waking cycle in brief?
8. What is Circadian Rhythm? How it works? Explain in detail?

Exam Code: 223302
(40)

Paper Code: 2161

Programme: Master of Arts (Psychology)
Semester-II

Course Title: Experimental Designs in Psychology

Course Code: MSYL-2443

Time Allowed: 3 Hours

Max Marks: 80

Note: Attempt five question out of eight. It is compulsory to attempt at least one question from each section. The fifth question can be done from any section..(16 marks each)

SECTION — A

1. Write a detailed note on Quasi-Experimental Designs.
2. What is Research? Write a note on Survey Research.

SECTION — B

3. What is Randomized Block Design? Elucidate its steps using hypothetical data.
4. Show your familiarity with Greco Latin Square Design using hypothetical data.

SECTION — C

5. What is ANOVA? Point out the underlying assumptions in its application.
6. In a research study, there were two experimental variables: a six-member group of player and three coaches who were asked to rate the players in terms of a particular trait on a ten-point scale. The data were recorded as under:

Rating by Three Coaches	PLAYERS					
	I	II	III	IV	V	VI
A	3	5	3	2	8	3
B	4	7	2	4	9	4
C	5	6	5	3	7	3

Apply the technique of ANOVA for analyzing these data.

SECTION — D

7. Show your familiarity with Duncan's Multiple Range Test.
8. What is ANCOVA? Show its steps using hypothetical data

Exam Code: 223302
(40)

Paper Code: 2162

Programme: Master of Arts (Psychology)
Semester-II

Course Title: Physiological Psychology

Course Code: MSYL-2444

Time Allowed: 3 Hours

Max Marks: 80

Attempt five question selecting atleast one question from each section. The fifth question may be attempted from any section. Each question will carry 16 marks.

Section-I

1. Critically evaluate the methods used in Physiological Psychology?
2. Describe the process of chemical transmission of neural impulse across the synapse?

Section-II

3. Describe the parts of forebrain and explain their functions?
4. Emotional reactions of person are modulated by Lintic system? Discuss?

Section-III

5. Explain the procedure of Stereotaxic surgery as research technique in Physiological Psychology?
6. Describe the principle of Electrical Stimulation research technique in detail?

Section-IV

7. Discuss the Biochemical basis of memory?
8. Explain the split-brain approach to learning problems in detail?

Exam Code: 223302
(40)

Paper Code: 2163

Programme: Master of Arts (Psychology)
Semester-II

Course Title: Abnormal Psychology

Course Code: MSYL-2445

Time Allowed: 3 Hours

Max Marks: 80

Note: Attempt any five question out of eight. It is compulsory to attempt at least one question from each section. The fifth question can be done from any section. All the questions carry equal marks. Each question carries 16 marks.

Section A

1. Write a detailed note on the classification of mental disorders. (16)
2. Explain various causes of mental disorders. (16)

Section B

3. Give a detailed description of Cyberchondria and Bipolar disorder. (8,8)
4. Describe Dissociative disorders along with its causes. (16)

Section C

5. Explain the personality disorders according to the clusters of personality. (16)
6. Write a detailed note on the causes and prevention of Alcohol. (16)

Section D

7. Elaborate the Schizophrenia along with its types. (16)
8. Explain-
 - a) ADHD and ODD
 - b) Encopresis & Sleepwalking (8, 8)
