REPORT
ON
Group Discussion on “Is Social Media making us less social?”
(06.04.2023)

On April 06, 2023 group discussion was conducted by Ms. Rajbeer Kaur (Faculty of Retail Management) for B.Voc.& M.Voc. (Retail Management) on the topic “Is Social Media making us less social?”. The aim of group discussion competition was to enhance the communication skills & confidence of the participants. The discussion was successful, the session seemed to have more energy and interest of the students. This session was highly interactive, and all the participants were very excited to put forth their opinion about the “Is Social Media making us less social?”

There were two groups in discussion, first who was in favour of the, second against it. Yes, social media is making us less social. Points discussed in the favour of the topic were like-

- By following friends on social media and not communicating with them privately, we can only know the things they post on their accounts. We may not know much about what is really happening in their lives. That means we will have no meaningful connections with friends.
- The convenience of contacting people online made us prefer it over meeting them outside.
- A few people now have social anxiety due to not having enough face to face interactions. When we avoid talking to people for a long time, automatically we develop a fear to involve in small talk.
- Trolling in social media is a big menace. It is affecting the self-esteem of many people and is also making them avoid forming social connections.
- In the present time, several people are addicted to smartphones and especially social media. This leaves them with no time to interact with people in real life. Even when they are speaking with people face to face, they are getting distracted by their phones and are not concentrating on the conversation.
- These days, when youngsters meet or go out together, most probably they are either taking pictures or recording videos. This is affecting their ability to maintain social connections.

No – social media is not making us less social. Points discussed in the favour of the topic were like-

- Due to social media, now we have the opportunity to connect with many people, even if they do not live in our area. Before social media, we could interact with people from either our locality or the places we go.
- During the covid pandemic time, social media helped people in maintaining their social life.
- Social media made it possible to stay connected with friends and loved ones all the time. We can easily know what is happening in their lives. It allowed us to communicate with multiple people at the same time by sharing posts.

- Through close-knit communities or micro-communities based on shared interests on social media along with private messaging, social media gave us an opportunity to build real connections with people we can really relate to.

The aim of this group discussion was to enhance the confidence, communication skills, leadership quality and thinking capacity. It was a healthy discussion, and everyone seemed to be keen to participate. The students were taking deep interest in the discussion points kept by other members of the group and overall discussion was highly productive.

The students were taking deep interest in the discussion points kept by other members of the group and overall discussion was highly productive. Overall the discussion was positive because each one of us contributed good information and everyone listened with the utmost interest when other members were sharing their ideas. Speaking in the group discussion is gradually bringing everyone in mainstream by boosting their self-confidence.

Lastly, Ms. Rajbeer Kaur tried to draw attention of the students to summaries and conclude the GD highlighting all the important points discussed by all the groups. It was an interactive session with valuable takeaways for all.
