

The Heritage Institution
Kanya Maha Vidyalaya (Autonomous College)
Jalandhar City

A Unified Code of Ethics for Research

Preamble

The Code of Ethics at Kanya Maha Vidyalaya is a good place to start learning about the ethical principles and standards that all researchers in the institution must follow. Research ethics should reflect high impactful and genuine research of high quality carried out by the researchers at this institution. This Code is a living document that will change and evolve as research practises in KMV expand and develop in accordance with the Government of India's objectives.

Principles of the Ethics Committee:

- All areas of the research must include the community as a full partner. The partnership should be characterised by constant consultation and collaboration.
- To give scholars with ethical counselling and academic support in the areas of teaching, research, and other academic activities. Researchers can seek the Ethics Committee for advice on ethical issues related to their research or any dispute on a completely voluntary basis.
- Research should aim to maximise the benefit for individuals and society.
- To ensure the privacy of individuals, research ideas, analysis and outcomes

Statement of Policy for the Code of Ethics in Research

Kanya Maha Vidyalaya adheres to the research ethical rules listed below.

- All researchers are expected to adhere to high standards of honesty, devotion, sincerity, and professionalism in all research projects they undertake.
- All researchers must follow the institution's rules and regulations, as well as avoid duplication, plagiarism, and research malpractice.
- All researchers must adhere to the strictest safety regulations in all areas, particularly in wet chemical, sophisticated instrumentation, and biological laboratories, as per standard chemical, biological, and other recommendations.
- For any survey or field study involving human subjects, the Institution's researchers adhere to the ethical rules, which have been authorised by the committee.
- Researchers adhere to the biosafety norms and guidelines for any bio-related research projects that have been approved by the committee.

- Any research involving a clinical trial using radioactive elements, humans etc activities must adhere to the norms and regulations of the Government of India, with prior approval from the relevant government agencies.

Following should be defined as Misconduct:

- Publishing or submitting the identical work to two distinct journals without informing the editors is unethical.
- Including any derogatory or personal remarks about any author in your book.
- In the laboratory, sabotaging or replicating other people's work.
- Unauthorized access to items from the laboratory, library, or office, such as supplies, books, data and software.
